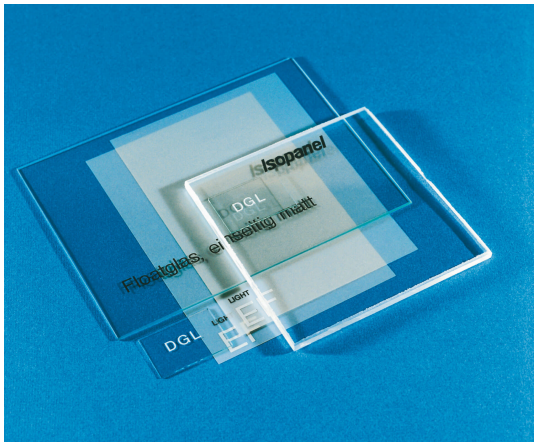
CO 4713

COLORIS®

CO 4713 is fast drying solvent-based stamping ink for non-absorbent materials of a light background colour.



Properties:
It gives smudge-proof prints which can hardly be removed and are durable even on extremely difficult surfaces. Smudge-proof, indelible markings are possible particularly on modern data carriers such as CD's or DVD's with this stamping ink.

Application:
We also recommend CO 4713 for marking aluminum, tinplate as well as painted and unpainted metal foils. Glass, enamel, porcelain, high-gloss brochures and the back of photographic prints as well as various plastics with light background can also be marked indelibly. A suitability test should be carried out, because so many different qualities are available to enable a reliable recommendation.

Drying time:
~30 sec (metal)

Viscosity:
low viscosity, ~10 - 30 sec
(Ford 4mm cup)

Stamp material:
Rubber, metal or special photo polymers

Stamp pad material:
We recommend mainly felt plate pads for CO 4713. In the case of automatic stamping machines, systems with an ink reservoir are preferrable.

Thinner/cleaner:
Thinner 410

Available standard sizes:
50ml/g · 250ml/g · 1000ml/g
